Profile

MCA student looking for opportunities in QA roles, with a strong foundation in SDLC, STLC, manual testing, and Java programming, along with hands-on experience in technical documentation, requirement analysis, and defect tracking via Jira. Familiar with Agile/Scrum methodologies and structured test case design, with recent exposure to testing LLM-based applications.

Technical Skills

- **Testing Concepts:** SDLC, STLC, Manual Testing, Test Case Design, Functional Testing, Regression Testing, Black Box Testing, UAT, Bug Life Cycle
- **Methodologies:** Agile, Scrum
- **Tools:** Jira (Bug Tracking & Sprint Management), MS Office – Excel (Test Case & Bug Tracking)
- **Programming Languages:** Java, C++
- **Web Technologies:** HTML, CSS, JavaScript, Bootstrap, JSP
- **Database & Backend:** MySQL, JDBC, SQL Query Writing, Hibernate
- **Digital Skills:** Search Engine Optimization, Social Media Optimization, Content Writing

Professional Experience

Manual Testing Intern *Aug 2026 – Present*
Codeacious Technologies

- Performing manual testing on **Coot AI**, an application that runs LLM models locally on-device using **Ollama** and **Hermes**, with support for cloud models via API and network models over LAN/WAN using vLLM.
- Designing and executing test cases to verify functional correctness, model-switching behaviour, and response reliability across local, cloud, and network configurations.
- Logging, tracking, and verifying bug fixes to ensure consistent application performance across all deployment modes.

Technical Writer *Aug 2025 – Jul 2026*
Aryson Technologies

- Reviewed software features against documentation to identify inconsistencies, gaps, and errors before publishing user-facing content, collaborating with development teams to verify accuracy.
- Documented reproduction steps, use-case scenarios, and troubleshooting guides.

Trainee – Full Stack Java Web Programming *May 2025 – Jul 2025 (3 Months)*
Anudip Foundation

- Learned Java, JDBC, Hibernate, JSP, Servlets, Swing, HTML, CSS, JavaScript along with SDLC and Agile/Scrum concepts applied throughout the development process.
- Developed and manually verified Java desktop and web applications with database connectivity, checking functional correctness before deployment.

Education

Master of Computer Applications (MCA) · Chandigarh University *2026 – Present*

Bachelor of Computer Applications (BCA) · CCS University, Sahibabad *2022 – 2025*

Diploma in French · Delhi University *2023 – 2025*

Senior Secondary Education (Class XII) · CBSE *2021 – 2022*

Secondary Education (Class X) · CBSE *2019 – 2020*

Projects

Employee Management System *Java, Swing, Hibernate, MySQL*

- Designed and developed a full-featured employee management desktop application using Java Swing for the GUI and Hibernate ORM for seamless MySQL database interaction.
- Implemented complete CRUD operations (Create, Read, Update, Delete) for employee records, ensuring robust data handling and referential integrity.
- Designed and executed manual test cases for all workflows – add, edit, delete, and search – verifying data validation rules and edge-case behaviour.

Social Media Optimization

- Grew a Facebook pagefrom 1K to 25K+ followers through strategic content planning, audience engagement, and analytics driven optimization.
- Analysed post performance metrics to identify high-engagement content patterns, iterating on strategy to achieve consistent organic growth.
